

Celotech Chemical Co., Ltd., a professional manufacturer of cellulose ethers, is going to attend the exhibition **American Coatings Show** which will be held in Indianapolis, U.S.A from April 12th till 14th, 2016. During this show Celotech will present a series of cellulose ethers for coatings and mortar industry that are being produced by Celotech.

Celotech is a company located in China that provides cellulose ethers and services to many essential markets globally. Celotech serves customers in lots of countries in construction industry with their products Celopro® HEC, Celopro® HPMC, Celofiber® cellulose fiber, Celopro® MHEC etc.

Celofiber® CF500W is one of our new products will can be used in Paint & Coatings application. The structure viscose behavior of Celofiber® CF500W has an outstanding influence on the anti-sagging effects of plasters and filling compounds. It improves the green stability substantially, thus enabling thick or thin layers to be applied in one single step without slipping down from vertical surfaces.

Please visit our **stands at No. 411 in INDIANA Convention Center** to have a detailed discussion.
